Marechal Deodoro – Alagoas

FRONT-END DEVELOPER | REACT

An emerging professional in the technology field with experience in developing IoT solutions, programming microcontrollers (Arduino and ESP32), algorithms, and creating smart interfaces.

SUMMARY OF QUALIFICATIONS

Front-End Developer with a degree in Mechatronics Engineering and a postgraduate specialization in Data Science and Artificial Intelligence. I have experience **building modern, responsive interfaces using HTML5, CSS3, JavaScript (ES6+), React.js, and Next.js**. My projects are focused on **usability and performance**, combining **strategic planning and attention to detail** to deliver efficient solutions.

My **analytical skills, critical thinking, and teamwork** enable me to **solve complex problems** and create innovative solutions. I value writing clean, high-quality code and maintaining a continuous learning process.

Knowledge

- **Databases:** PostgreSQL, MySQL
- **ORM Tools:** Prisma
- **Containers and Virtualization:** Docker
- **Automation:** Gulp, Grunt, Parcel
- **Automated Testing:** React Testing Library
- **Styling:** SASS, LESS
- **Front-End Development:** jQuery, Object-Oriented Programming with TypeScript and JavaScript, Vue.js
- **Back-End:** Node.js, Express, API Development

Skills

- **Front-End Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js
- **State Management:** React Hooks, Redux, Redux Toolkit Query
- **Automated Testing:** Jest, Cypress
- **REST APIs:** Fetch API, integration, and data manipulation
- **Styling and Layout:** CSS Modules, Styled-Components, Bootstrap, Responsive CSS
- **Version Control:** Git, GitHub
- **Static Typing:** TypeScript

ACADEMIC BACKGROUND

- **Front-End Developer** – Professional Training Course – EBAC – 05/2024 to 12/2024;
- **Data Science and Artificial Intelligence** – Postgraduate – PUCRS – 03/2022 to 03/2023;
- **Mechatronics Engineering** – Undergraduate – UNIT-AL (Currently named UNIMA) – 02/2017 to 02/2022.

COURSES/COMPLEMENTARY ACTIVITIES

- Next.js Course: Generating Static Sites with SSG – Alura – 2024
- Back-End Dev Immersion – Alura – 2024
- Next.js Course: Building with Server Actions – Alura – 2024
- Next.js Course: Build Your Applications with Postgres and Prisma – Alura – 2024
- Docker Course: Creating and Managing Containers – Alura – 2024
- Next.js Course: Learn the React Framework – Alura – 2024
- Dev Immersion with Google Gemini – Alura – 2024
- Maker Education 4.0 Course: Active Methodologies and Innovative Technologies – IFAL – 2023
- C Programming Language Course – WR Kits – 2022
- Python Mini-Course – Diego Mariano – 2020
- Here is the link with the certificates of the completed courses:

RELEVANT PROJECTS

- | | |
|--|---------|
| E-food | 11/2024 |
| <ul style="list-style-type: none">• Description: An online store application that allows users to explore restaurants and their dishes, providing an interactive ordering experience. | |

- **Technologies:** Developed with React, Styled-components, React Router DOM, and Redux for state management and data fetching.
- **Features:** Allows users to add/remove dishes from the cart, display dish details in a modal, and track item quantity and total price.
- **Objective:** To create a practical and functional online ordering solution based on a Figma design, as part of the EBAC course final project.

Agenda de Contatos 09/2024

- **Description:** Development of an intuitive web application for managing personal and professional contacts, allowing users to add, edit, and delete contacts.
- **Technologies:** Uses React for the interface, Styled-components for styling, Redux for state management, and TypeScript for code safety with static typing.
- **Features:** Allows easy manipulation of the contact list, ensuring synchronization throughout the app and a smooth user experience.
- **Objective:** To simplify the organization and management of personal and professional contacts.

Quiz Interativo 09/2024

- **Description:** Development of an interactive quiz as part of the challenge promoted by Alura's Imersão Dev in partnership with Google Gemini, allowing players to choose categories and check their scores.
- **Technologies:** Uses HTML, CSS, and JavaScript to implement dynamic categories, offering a varied experience where players can select different question themes.
- **Features:** Adds a visual and sound countdown, instant feedback after each answer, and displays the final score, increasing excitement and interaction during the game.
- **Objective:** To provide an engaging and dynamic gaming experience during the Alura challenge, which could reward winners.

Clone do Disney+ 07/2024

- **Description:** Building a Disney+ clone using HTML, CSS, and JavaScript, providing an interactive and engaging experience.
- **Technologies:** Uses SASS to create modular and reusable styles, and Gulp to automate development tasks such as SASS compilation and JavaScript minification.
- **Features:** Creates responsive layouts that adapt to different screen sizes and devices, with interactive components like accordions and tabs.
- **Objective:** To replicate the Disney+ experience in a web app, demonstrating front-end development skills and the ability to create interactive interfaces.

Techbooks 06/2024

- **Description:** Development of a fictional online bookstore website using Bootstrap to ensure a responsive and visually appealing design.
- **Technologies:** Uses HTML and CSS for page structure and styling, with version control managed through Git.
- **Features:** Implements interactive features such as efficient navigation and interactivity in the store, enhancing the user experience.
- **Objective:** To create an interface that is not only visually attractive but also offers a smooth and accessible shopping experience across devices.

PROFESSIONAL EXPERIENCE

SEBRAE (Maceió/Alagoas) 03/2024-05/2024

Market Research Analyst – Trainee

- Conducted studies to identify new business opportunities in the maker lab, collaborating with cross-functional teams.
- Designed and executed digital manufacturing projects, including laser cutting and 3D printing, providing customized solutions for internal and external clients.
- Participated in meetings and events hosted by SEBRAE to promote an entrepreneurial culture.

IFAL (Marechal Deodoro/Alagoas) 11/2023-12/2023

Instructor of IoT Maker Course (duration: 20h) – Temporary Position

- Developed educational materials and led classes for IFAL staff and alumni.
- Guided students in building practical projects using Arduino and ESP-32, focusing on applying C++ programming concepts for automation and technological innovation.
- Gained experience in applying technology in projects, fostering a hands-on approach in the IoT field.

LANGUAGES

- Portuguese: Native.
- English: Intermediate.
