Marechal Deodoro

Fullstack Developer | Python, TypeScript/React, Applied AI

SUMMARY OF QUALIFICATIONS

Fullstack Developer focused on applied AI, working end to end: Python/FastAPI backends, React/TypeScript interfaces, integrations with WhatsApp, customer service platforms and n8n, and production deployment with Docker. Experienced in building **chatbots with RAG and AI agents**, machine learning prototypes and internal tools used in daily operations. Committed to tested code, organized version control and clear documentation.

Skills:

- **Frontend**: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Tailwind CSS and Vite;
- **Backend**: Python (FastAPI and Django) and Node.js;
- **Databases**: PostgreSQL/Supabase, Oracle, MySQL and Redis; vector databases Qdrant, Milvus and FAISS;
- **AI & Machine Learning**: RAG, agents with Agno, CrewAI and LangChain/LangGraph, OpenAI and Gemini APIs, data processing and scikit-learn models;
- **Integrations & Automation**: n8n, Evolution API (WhatsApp), Chatwoot, webhooks and REST APIs;
- **Infrastructure**: Docker/Docker Compose, Portainer, Linux VPS, Cloudflare (R2 and Pages) and GitHub Actions;
- **Testing & Version Control**: pytest, Vitest, Git, GitHub and GitLab; AI-assisted development (Claude Code).

EDUCATION

- Data Science and Artificial Intelligence – Postgraduate Program – PUCRS – 03/2022 to 03/2023;
- Mechatronics Engineering – Bachelor's Degree – UNIT-AL (currently UNIMA) – 02/2017 to 02/2022.

COURSES / ADDITIONAL ACTIVITIES

- Fullstack JavaScript Program: project with React and Node.js – Alura, 2025
- Frontend Immersion, 2nd Edition – Alura, 2025
- React Native: development with Expo – Alura, 2025
- React (SOLID principles applied) – Alura, 2025
- Next.js Course: framework overview, SSG, server actions, and Postgres/Prisma integration – Alura, 2024
- Backend Developer Immersion – Alura, 2024
- Node.js: Cryptography and JWT Tokens – Alura, 2025
- Docker Course: container creation and management – Alura, 2024
- Data Science & Machine Learning – various courses, hands-on practice with NumPy, Pandas, Random Forest, and unsupervised algorithms – Asimov Academy, 2025
- Developer Immersion with Google Gemini – Alura, 2024
- Maker Education 4.0: Active Methodologies and Innovative Technologies – IFAL, 2023

Certificates available at: https://drive.google.com/drive/folders/1VxEy4B22xHI-jN1x2Yzxdvxz-4ylO3kX?usp=sharing.

PROFESSIONAL EXPERIENCE

Tiro na Lua (Remote)_____04/2026-Present

Software Solutions Developer – Technology Team

- Built a WhatsApp chatbot backend from scratch for social projects, using FastAPI, Evolution API, PostgreSQL, Redis and Docker, with AI answers using RAG on Qdrant, audio transcription and conversation mirroring to the customer service platform;
- Created a Markdown editor (React + TypeScript, with a FastAPI backend) for the team to maintain the chatbots' AI knowledge base;
- Built a visual chatbot flow builder with an execution engine on n8n and Supabase/PostgreSQL, AI classification of answers (yes/no, sentiment and open-ended) and automatic resending of undelivered messages;
- Customized the open-source customer service platform Chatwoot used by the operations team: team-scoped inboxes, labels and reports, label inheritance, automatic conversation reopening and removal of auto-assignment, with automated tests and production deployments;
- Managed production infrastructure (Docker, Portainer, backups and deployments), including migrating media storage from the VPS to Cloudflare R2;

- Helped standardize the team's work with a Git workflow featuring protected branches and AI-powered code review, a central technical context repository for AI agents, and documentation, presentations and explainer videos.

OFM Systems (Maceió/Alagoas)_____04/2025-04/2026
Fullstack Developer for Web Solutions and AI Applications

- Developed a timesheet and kanban system with a FastAPI API integrated with Oracle and a React + TypeScript + Tailwind frontend, automatically generating models, schemas and routes from the database;
- Prototyped an AI agent for project analysis (LangChain/LangGraph + Gemini, RAG with FAISS) that produces reports on risks, bottlenecks and S-curves;
- Designed a mathematical productivity model for the time management project, with a penalty for rework;
- Built a classification proof of concept for credit reconciliation, tuning the threshold to favor recall and creating confidence tiers to reduce manual review;
- Prototyped automated collection of municipal legislation with Firecrawl and CrewAI agents, indexed in Milvus for semantic search.

SEBRAE (Maceió/Alagoas)_____03/2024-05/2024
Market Research Analyst – Trainee

- Conducted studies to identify new business opportunities in the maker lab, collaborating with cross-functional teams;
- Designed and executed digital fabrication projects, including laser cutting and 3D printing, delivering customized solutions for internal and external clients;
- Participated in meetings and events organized by SEBRAE to promote entrepreneurial culture.

IFAL (Marechal Deodoro/Alagoas)_____11/2023-12/2023
IoT Maker Course Instructor (20-hour program) – Temporary Position

- Developed teaching materials, animations, and hands-on activities to introduce Arduino and ESP32 to trainees and graduates;
- Guided students in creating automation projects, applying C++ programming concepts and encouraging hands-on learning;
- Helped participants explore new technologies and recognize their potential for educational and technological innovation.

LANGUAGES

- Intermediate English;
- Native Portuguese.
