Marechal Deodoro

Fullstack Developer | React, Python, APIs

Rising professional in the technology field, working as a Fullstack Developer focused on Artificial Intelligence applications, specialized in React, Python, and Node.js. Experienced in web application development, system integration, automation, and the creation of interactive interfaces, with complementary knowledge in machine learning, AI solutions, and IoT projects using Arduino and ESP32

SUMMARY OF QUALIFICATIONS

Fullstack Developer focused on **Artificial Intelligence applications**, specialized in **React, JavaScript/TypeScript, and Python**. Experienced in building integrated and scalable web applications, automation, system integration, and interactive interfaces. Committed to code quality, best practices, and delivering efficient solutions, combining fullstack expertise with innovation in AI and machine learning.

Skills:

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript and React.js;
- **Backend:** Python (FastAPI and Django) and Node.js;
- **Databases:** Oracle, MySQL and Milvus;
- **IA & Machine Learning:** Data processing, dataframe manipulation, model creation and training, development of agents using CrewAI and Agno, use of n8n for agent creation, and integration of vector databases;
- **Version Control:** Git, GitHub and GitLab.

EDUCATION

- Data Science and Artificial Intelligence – Postgraduate Program – PUCRS – 03/2022 to 03/2023;
- Mechatronics Engineering – Bachelor's Degree – UNIT-AL (currently UNIMA) – 02/2017 to 02/2022.

COURSES / ADDITIONAL ACTIVITIES

- Fullstack JavaScript Program: project with React and Node.js – Alura, 2025
- Frontend Immersion, 2nd Edition – Alura, 2025
- React Native: development with Expo – Alura, 2025
- React (SOLID principles applied) – Alura, 2025
- Next.js Course: framework overview, SSG, server actions, and Postgres/Prisma integration – Alura, 2024
- Backend Developer Immersion – Alura, 2024
- Node.js: Cryptography and JWT Tokens – Alura, 2025
- Docker Course: container creation and management – Alura, 2024
- Data Science & Machine Learning – various courses, hands-on practice with NumPy, Pandas, Random Forest, and unsupervised algorithms – Asimov Academy, 2025
- Developer Immersion with Google Gemini – Alura, 2024
- Maker Education 4.0: Active Methodologies and Innovative Technologies – IFAL, 2023
- C Programming Language – WR Kits, 2022
- Python Mini-Course – Diego Mariano, 2020

Certificates available at: <https://drive.google.com/drive/folders/1VxEy4B22xHI-jN1x2Yzxdvxz-4ylO3kX?usp=sharing>.

PROFESSIONAL EXPERIENCE

OFM Systems (Maceió/Alagoas) _____ 04/2025-Present

Fullstack Developer for Web Solutions and AI Applications

- I work on the development of fullstack solutions using React, TypeScript, Tailwind, Python, and Node.js, building integrated web applications that optimize processes and enhance user experience;
- I also develop machine learning models, performing data processing, dataframe manipulation, and model building to support strategic decision-making;
- I create intelligent agents using CrewAI and Agno and integrate vector databases, automating workflows and enhancing information retrieval;
- I participated in a time management project, developing a mathematical model to measure productivity and identify performance patterns;

- I collaborate with multidisciplinary teams, delivering scalable solutions while applying version control and best practices to ensure high software quality.

SEBRAE (Maceió/Alagoas) _____ 03/2024-05/2024

Market Research Analyst – Trainee

- Conducted studies to identify new business opportunities in the maker lab, collaborating with cross-functional teams;
- Designed and executed digital fabrication projects, including laser cutting and 3D printing, delivering customized solutions for internal and external clients;
- Participated in meetings and events organized by SEBRAE to promote entrepreneurial culture.

IFAL (Marechal Deodoro/Alagoas) _____ 11/2023-12/2023

IoT Maker Course Instructor (20-hour program) – Temporary Position

- Developed teaching materials, animations, and hands-on activities to introduce Arduino and ESP32 to trainees and graduates;
- Guided students in creating automation projects, applying C++ programming concepts and encouraging hands-on learning;
- Helped participants explore new technologies and recognize their potential for educational and technological innovation.

LANGUAGES

- Intermediate English;
- Native Portuguese.
